Principal
Dr. B.K. Garg

Respected Sir/Madam,

It is our privilege to invite you to Hindu College, Sonapat to attend one day National Seminar (Multidisciplinary) sponsored by Directorate of Higher Education, Haryana on the topic "Emerging issues in Indian Economy". A lot of discussion about the emerging Issues of Indian Economy has been done; still there is a long way to go. As academicians, it is our duty to make efforts in order to solve the present problems. The seminar will provide a platform for interaction and discussion on the various issues of Indian Economy. It will also help in exploring the different innovative ways to overcome the problems of economy. We will feel honored if you kindly spare your valuable time to attend the seminar and make it a grand success.

ABOUT THE HINDU SOCIETY

The Sonapat Hindu Educational and Charitable Society is one of the oldest and reputed educational societies of northern India since 1914. It has come up as an epitome of excellence in the field of learning where young buds are developed to blooming flowers. The achievements of the students speak in volume about the innovative and earnest efforts of the society and staff. The academics, a healthy set of cultural and co-curricular activities, help to serve a wholesome meal to satiate the hunger of aspiring socially responsible leaders of tomorrow. The Trust is looking ahead for a glorious future and putting its best foot forward to enlighten and empower young seekers with quality education.

ABOUT THE HINDU COLLEGE

Hindu College, Sonapat was established in the year 1956. In 1958, it carved out a niche for itself in the former composite Punjab State in the form of a creditable institution when its student Ramdhan Singh topped the merit list of Intermediate examination (FA) conducted by the Punjab University, Chandigarh to which this college stood affiliated at that time. Ever since, the college has maintained the high tradition. Our achievements have been progressive from the very beginning when the college was affiliated to Punjab University, Chandigarh. It has given a number of reputed and dedicated doctors, engineers, administrators, lawyers and public servants to society.

ABOUT THE SEMINAR

Indian economy is a mixed economy, growing with a fast pace in leaps and bounds. According to World Bank Report, Indian Economy has now become world's sixth biggest economy pushing France to seventh place. According to World Bank, Indian Economy is benefitted from robust performances in manufacturing sector pushed by increased consumer spending. With the doubling of its GDP in less than past 10 years, India is emerging as the engine of economic growth in Asia. IMF has predicted its growth at 7.4% in 2018 and 7.8% in 2019 whereas it would be 3.9% for world economy. The long term growth prospects of Indian economy are bright due to its young population, low dependency ratio, healthy savings and investment rates and increasing integration into the global economy.

Despite previous reforms, economic growth is still significantly slowed by bureaucracy, poor infrastructure and inflexible labour laws. India is facing many problems such as low per capita income (20 times less than in France), excessive dependence on agriculture and primary production activities, high rate of population growth, existence of chronic unemployment and under-employment, poor rate of capital formation, inequality in the distribution of income and wealth, low level of technology, lack of infrastructure facilities, gender inequality and many more. These emerging issues are the basic fabric for the development and upgradation of today's Business Environment.

As "Make in India" is a major national programme of the Government of India designed to facilitate investment, enhance skill development, foster innovation and build best in class manufacturing infrastructure in the country. This topic definitely contributes in achieving objectives of the scheme. The participation of various scholars, researchers and eminent personalities, the views that they will give, the discussion that will take place in the technical sessions, would clarify the misconceptions and will give concrete results.
